

780nm SM MEMS VOA

780nm SM MEMS Variable Optical Attenuator (MEMS VOA) is an optoelectronic products designed for attenuating the optical power, it integrates with a MEMS chip inside to adjust the angle of the reflection prism to achieve the optical power attenuation function, it's widely used in WDM fiber system, fiber line protection and optical power monitoring field.

Application:

Fiber Communication
EDFA Power Protection
Fiber Line Protection
Testing System

Features:

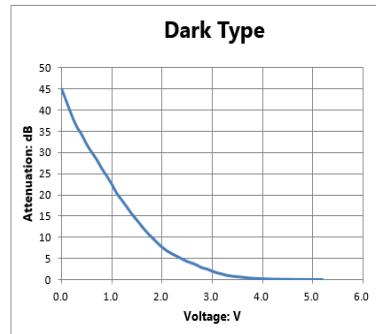

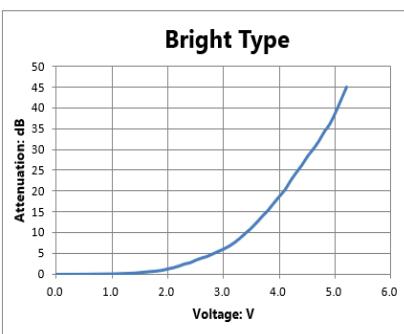

Compact Package
High attenuation
High responsivity
High Reliability

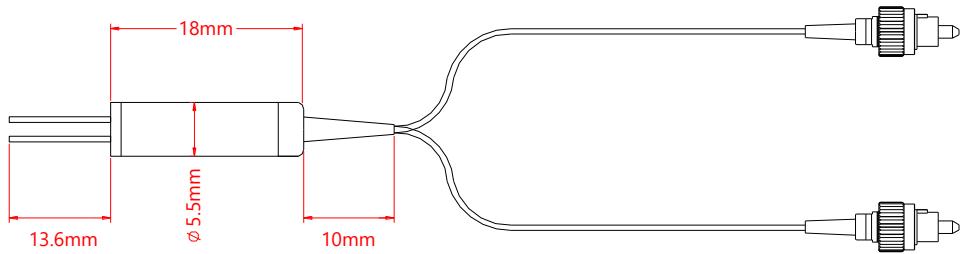

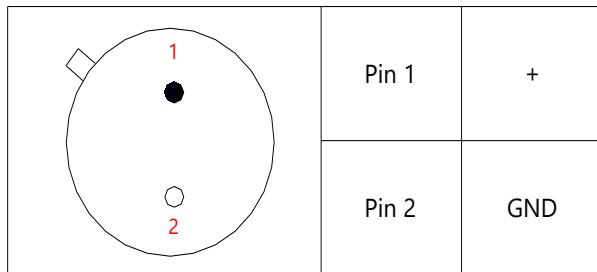

Specifications:

Parameter	Symbol	Value	Unit	Test Condition
Center Wavelength	λ	780	nm	
Bandwidth	BW	± 10	nm	
Min. Attenuation Range	Att.	30	dB	
Typ. Insertion Loss	IL	1.0	dB	0dB attenuation
Max. Insertion Loss	IL	1.2	dB	
Max. Wavelength Dependent Loss	WDL	0.8	dB	0dB attenuation
		2.0	dB	20dB attenuation
Max. Wavelength Ripple		0.05	dB	20dB attenuation, 0.4nm Bandwidth
Max. Polarization Dependent Loss	PDL	0.1	dB	0dB attenuation
		0.3	dB	20dB attenuation
Max. Temperature Dependent Loss	TDL	0.2	dB	0dB attenuation
		1.5	dB	20dB attenuation
Max. Polarization Mode Dispersion	PMD	0.1	ps	
Max. Response Time		3	ms	
Driving Voltage	V	6 or 15	V	
Min. Return Loss	RL	45	dB	
Max. Optical Power (CW)	P	500	mW	
Fiber Type		HI 780 fiber	-	
Operating Temperatuer	T	0 to 70	°C	
Storage Temperature	T	-40 to +85	°C	

Notice: Above specifications are tested at center wavelength without connector in room temperature @23 °C.

For devices with connectors, IL will be 0.3dB higher, RL will be 5dB lower.

Notification:

1. The MEMS products are particularly sensitive of ESD (electro-static discharge), it's recommended to use grounded anti-static wrist straps and grounded anti-static mats before handling the products.
2. Make sure the driving voltage is 0V before and after operating.
3. when switching on the circuit, connect ' - ' (pin2) first, then ' + ' (pin 1) and upgrade voltage slowly. when switch off the circuit, power off ' + ' (pin 1) first, then ' - ' (pin 2).
4. Always take anti-static measures to storage the products when not in use.
